

TEAM 26

Phase [4]

Boyue Zheng ([bzheng42](#))

Tianyu Zhan ([tzhan34](#))

Yinquan Lu ([ylu461](#))

Yuntian Zhang ([yzhang3469](#))

Directions

Set up mysql database on local machine

Notes: Please use the Team26_DB_Phase4.sql (we changed the initial password to md5 edition.)

Requirements

python 3.7

flask, pymysql, requests

Instructions to start app

1. You may need to create `db_account_config_local.py` and edit your connection strings
 - As an template, `db_account_config.py` is the default config file. And you need to change password to your mysql password.
2. `cd team26_phase4\` and run `python app.py`
3. Go to `http://<localhost>:<port>/login.html` on your browser and you should see our login web page.

APP Technologies Used

1. Database & Data Management Systems: MySQL v8.0 or later
2. Back End Technologies: Python (Flask, PyMySQL)
3. Web Applications: HTML/CSS/JavaScript/Bootstrap
